CLEANING & DEODORIZING NON-RINSE SURFACE TREATMENT

SUSTAINABLE WELLNESS SOLUTIONS THAT SAFEGUARD THE ENVIRONMENT

Say Goodbye to Mold, Algae, and Stubborn Stains!

MADE IN FLORIDA

DISCOVER THE POWER OF STIZE NRS

- NON-RINSE SOLUTION offers an innovative and effective method to eliminate mold, mildew, and fungus without the chemical toxicity of alcohol and chlorine. With just a simple spray on the affected area, this powerful solution handles the task effortlessly.
- It ensures the safety of workers and is eco-friendly, making it a responsible choice for the environment.

Florida Biotech

EXTERIOR TREATMENT

Ecological alternative to commonly used (high toxicity bleach or chlorine) with very similar immediate result and long duration continuous efficacy. Can be subjected to rain or moisture within 10 minutes but will continue to perform. Water based, low environmental footprint. Broad mold and mildew kill spectrum. Natural citrus scent. Available in ready-to-use bulk and in gallons as 2X and 5X "Pro" concentrate.

INTERIOR TREATMENT

Superior formulation to "Hydrogen peroxide only" frequently corrosive alternatives. Positively charged – can also be applied electrostatically to efficiently cover all surfaces. Available in convenient 32oz spray, gallons and bulk.

why choose STIZE NRS

1. Safe and Effective: Our powerful formula tackles mold and algae effectively while being safe for your family and pets.
2. Time and Cost Efficient: With NRS, cleaning is a breeze, saving you time and money on repetitive cleaning products.
3. Easy Application: No need to hire professionals: simply apply and see the magic happen!
4. Eco and Surface Friendly: NRS is chlorine-free, environmentally friendly, and leaves no surface damage.

POWERFUL AND SAFE TO USE

- Chlorine, Bleach free
- Safe to apply (Application does not require professional experts)
- Time efficient (Acts Instantly and does not require any surface scrapping)
- Cost efficient
- Non-corrosive, non staining
- Easy to apply
- Plants and grass friendly
- Eco-friendly
- Surface Friendly (Does not induce any discoloration or surface degradation)

WHY CHOOSE STIZE OVER CHLORINE?

Although chlorine Based cleaners and Disinfectants are effective cleaning agents, they come with major safety concerns. Many countries have banned chlorine bleach or restricted its use in an effort to protect the environment and human health. Once it reaches the water, chlorine reacts with other minerals and elements to form a host of dangerous toxins. These toxins, including dioxins, furans and polychlorinated dibenzodioxins (PCDD)s are often referred to as "persistent organic pollutants" because they linger in the water or soil and take many years to disappear. Some of the dangers resulting from the usage of chlorine-derived products include:

- Durable and continue to act effectively for several days to weeks.
- Safe to apply (Application does not require professional experts)
- It is efficient on several types of surfaces including wood, bricks, and concrete.
- STIZE NRS showed its efficacy to clean indoor walls after being soiled by Category III flooding episodes, especially in catastrophic sites hit by strong hurricanes.

- Production of chlorine gas which can irritate the nose, skin, throat, and eyes
- Dermatitis
- Breathing problems
- Corrosion of fabrics

What's mold's biggest fear?

A clean sweep from STIZE NRS!
